case study

a showcase of innovation

client / location:

BT Showcase & Innovation Centre, Stockport.

challenge:

the Showcase & Innovation Centre are both key areas of high client and corporate presentations for our client. This shared facility needed to equally benefit all site operators and clients through enhancing the visitors' appreciation of the overall site, available facilities & demonstration areas. The brief for eastlake commercial interiors (eci) and wave was to create a scheme where:

- each area had to be distinctive
- solution should embrace the future requirements of the Centre.

Size + cost:

350sq m for the Showcase and 130sq m for the auditorium
£1.3m for the whole project delivered by eci.

AV solution:

The solution was an integrated installation with:

- 8 AMX controlled zones, featuring 64 x 32 XGA matrix to display any PC to any location
- three edge blended Christie projectors projecting a 10m wide display with full picture in picture for multiple PC and video displays on a curved wall
- data suite featuring 8 displays and full AMX automation
- partitionable AV zones to allow the client maximum flexibility
- Onelan display system to provide welcome information and live news feeds.
